Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 23-24 and 26-39, drawn to an apparatus for simultaneously monitoring an array of reaction sites for light indicating that a reaction is taking place at a particular site; and claim 25, drawn to an apparatus for identifying a target base in a DNA sequence.

Group II, claim(s) 40-45, drawn to a method of identifying a target base in a DNA sequence.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of Group I requires the presence of a sample receptacle, and dispensing means for dispensing at least one reagent into said samples. In contrast, the method of claim 40 does not require any sample receptacle nor dispensing means. Further, the apparatus of claim 23 need not comprise any DNA. Accordingly, the inventions of Groups I and II are not so linked by a special technical feature so have unity of invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
